Career Objective

Aspiring AI & Machine Learning Engineer and Full-Stack Developer with hands-on experience building intelligent, production-ready applications using Python, TensorFlow, React, Node.js, PostgreSQL, and REST APIs. Skilled in LLM integration, ML model development, scalable backend systems, and cloud deployment, with a passion for delivering end-to-end AI-powered solutions.

Experience & Projects

Full-Stack Development Trainee - Coromandel Skill Development Center June 2026 - August 2026

- Completed hands-on training in full-stack web development covering HTML, CSS, Bootstrap, JavaScript, React, Node.js, and SQL across 10+ structured, project-based modules.
- Built responsive front-end interfaces and RESTful backend services, delivering 12 project-based deliverables as part of the curriculum.

ArcForge - Full-Stack Modular Product Suite July 2026

- Architected a multi-role, full-stack suite (React, Node.js/Express, PostgreSQL, JWT) with a real-time IoT telemetry pipeline using Aedes MQTT and Socket.IO, streaming live sensor data for 32 simulated machine nodes.
- Developed a multi-format student evaluation platform (ArcEval) and a hands-free voice-controlled presentation HUD using the Web Speech API for real-time intent parsing and dynamic UI rendering.

AI-Powered Python Debugger and Tutor April 2026

- Built a React-based platform for automated Python debugging and tutoring, integrating an LLM with a RAG pipeline using contextual retrieval to generate targeted debugging guidance and feedback.
- Containerized the application with Docker and automated code-analysis workflows, achieving 80% bug-detection coverage in testing.

Lint AI - Tech Debt Analysis Tool October 2025

- Built a full-stack tool that analyzes codebases for technical debt and auto-generates PDF reports, supporting multi-folder scans across user-selected codebases of any size.
- Implemented scoring logic to flag code smells, complexity issues, and maintenance risk across 10 distinct issue categories.

AI & ML Intern - Sweach Foundation May 2024 - July 2024

- Engineered and trained machine learning models in Python and TensorFlow, achieving 90% training accuracy and 73% prediction accuracy through iterative tuning.
- Designed and optimized data preprocessing pipelines to improve model training efficiency and overall pipeline performance.

Frontend Developer Intern - Technical Hub September 2022 - December 2022

- Built responsive, cross-browser web applications using HTML, CSS, JavaScript, and Bootstrap, tested across 2 major browsers for UI consistency.
- Deployed and maintained applications with PHP, XAMPP, and AWS, streamlining local-to-cloud deployment to within a single day.

Technical Skills

Languages: JavaScript, Python, Java, C

Frameworks: React, Node.js, FastAPI, TensorFlow Lite

Technologies: REST APIs, RAG, SQL, MongoDB, PostgreSQL, Redis, Socket.IO, MQTT, Git, GitHub, AWS

Tools & Practices: Docker, Agile & Scrum Methodologies, Jira, Jenkins (CI/CD Basics), Version Control Workflows

Certifications & Achievements

- AWS Cloud Practitioner
- TensorFlow Developer Certificate
- Machine Learning Specialization (FMML) by IIIT Hyderabad
- 2nd Prize** – KIET Hackathon, for building an AI-powered solution in 24 hours.
- 3rd Place** – Frontend Development Bootcamp, among a competitive cohort.

Education

B.Tech (CAI), KIET, *Korangi* (2023 - 2026)

CGPA: 8.17

Diploma (ECE), Aditya Polytechnic College, *Surampalem* (2020 - 2023)

Percentage: 92%

Yoganand High School, *Kakinada* (2020)

Percentage: 95%
